

**Boston, USA, 30-31 May 2018 - Skin Microbiome Congress**

SKIN MICROBIOME CONGRESS will focus on translating microbiome research into clinically & commercially viable cosmetics & therapeutics, revolutionizing dermatology.

**Marisa Meloni, CEO**, will contribute with a lecture entitled:

**BACTERIA AND YEASTS COMPETITION MODELS ON 3D HUMAN TISSUES: A UNIQUE TOOL TO EXPLORE SKIN RESPONSES**, on May 30<sup>th</sup>, at 13:15.

The lecture will focus on relevant study cases illustrating the advantages of VitroScreen models to assess ingredients and formulations efficacy in modulating skin innate and immune-mediated responses to microbiota modification : bacterial and yeasts adhesion mechanisms, biofilm formation and eradication, competition models recapitulating healthy skin microbiota, dandruff, acne, underarm species, atopic dermatitis based on *S.aureus*, skin benefits of topically applied pre, post and probiotics viable or inactivated.

VitroScreen is Event Partner : [www.skinmicrobiomecongress.com](http://www.skinmicrobiomecongress.com)
